

Appln. No. 10/018,889  
Amd. dated September 2, 2004  
Reply to Office Action of May 6, 2004

**Amendments to the specification:**

Please replace the paragraph extending between page 5, line 27 and page 6, line 3 with the following amended paragraph:

When someone wants to transmit his message after completion of current communication, a new carrier frequency is determined when such someone or sender depresses the PTT button ~~6~~4. Due to this, it is possible for the user to enjoy communication with the use of these frequencies, which are changed each time the transmitting and the receiving operation are performed.
